#### **NetHAM** nano

The monitoring service on cloud

Network Technology Lab NECTEC

Panita Pongpaibool Chavee Issariyapat

nano@netham.in.th

## ปัญหา IT ที่พบบ่อยในองค์กร

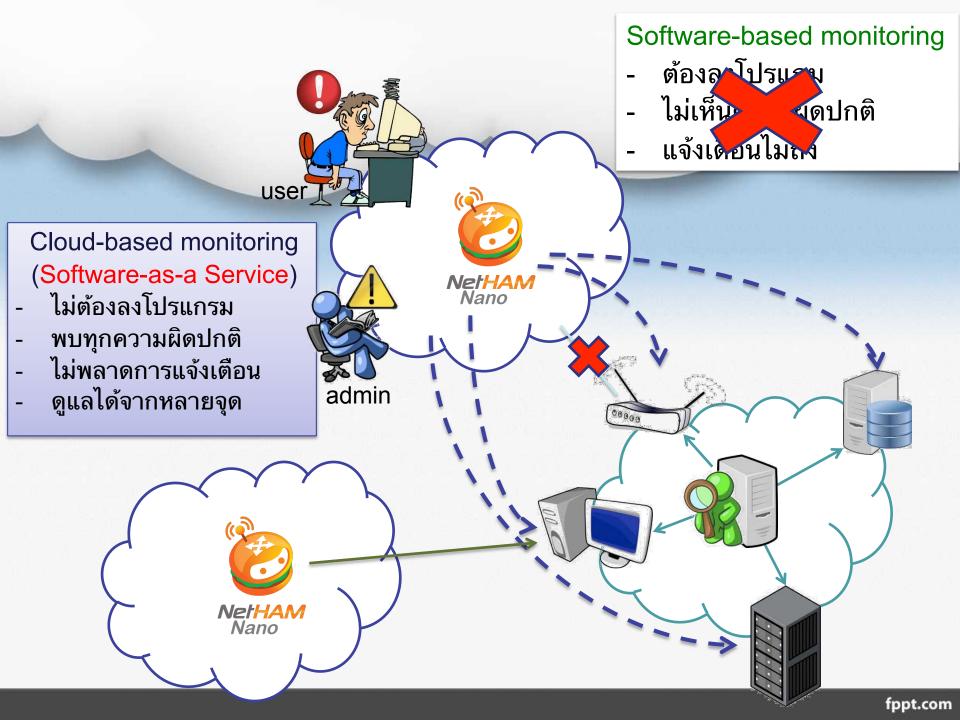

- 1. Site outage
- 2. Slow Internet

#### Loss to business

- Sale
- Customers
- Reputation
- Productivity

Update: It looks like the outage may be isolated to EAST-1, so not all of EC2. Still, all of the companies above and hundreds of others are clearly affected right now.

## Why NetHAM Nano?

Very simple

Anyone can use

No software

No headaches

No hardware

Big savings

Cloud-based

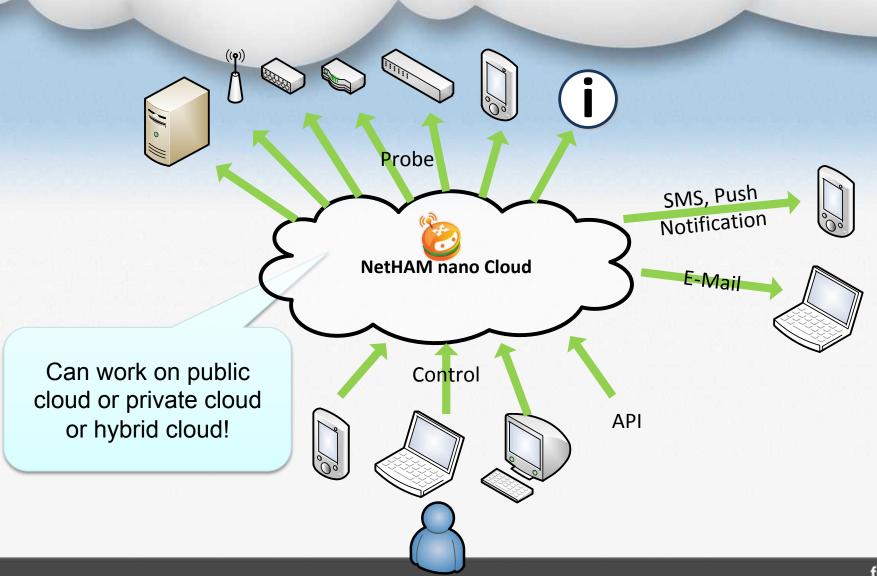

Zero downtime

Award-winning\*

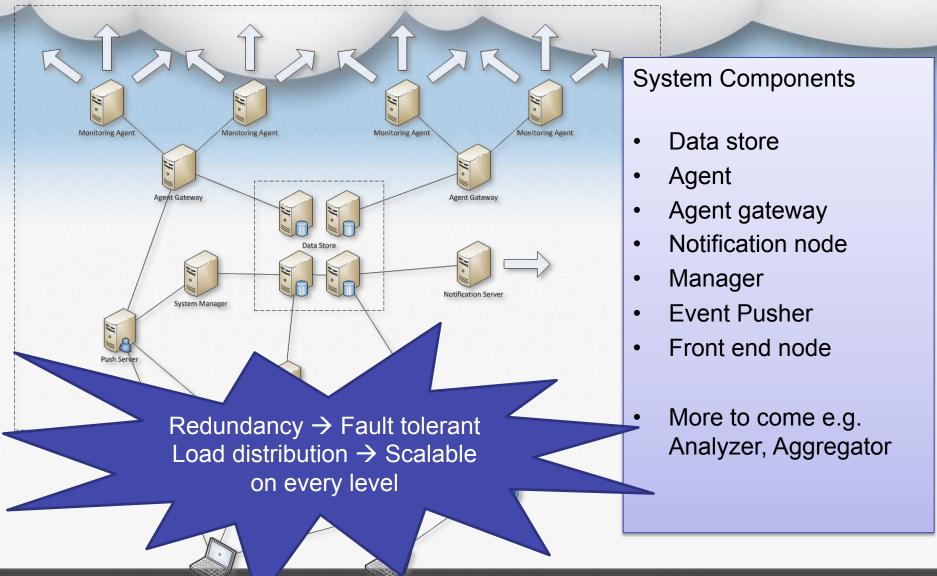

Proven technology

## Logical Architecture

#### Inside the Cloud

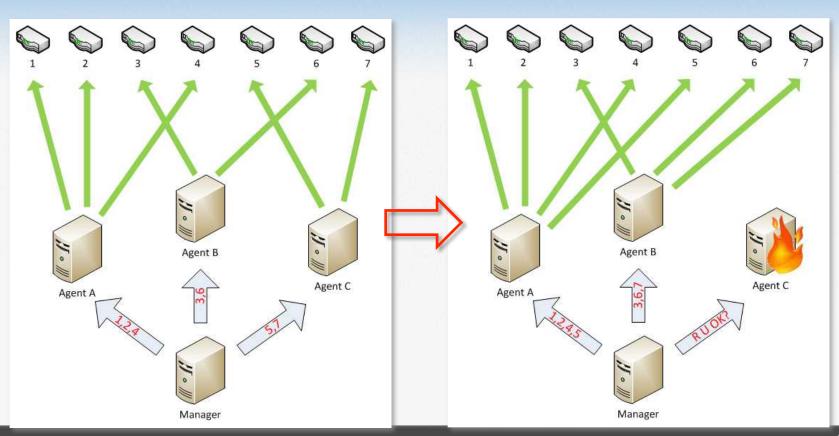

## Agent

#### Things agent must do

- Configurable scheduling daemon.
- Must works behind NAT.
- Flexible enough to extend the functionalities.

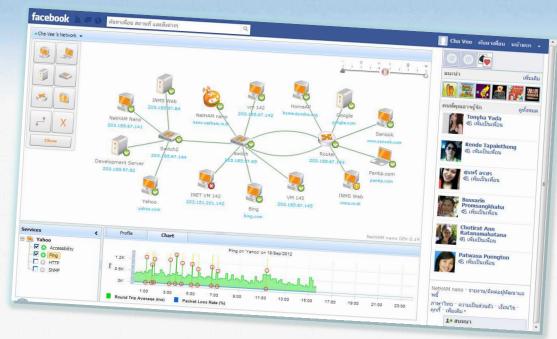

### Failover Mechanism

Monitor jobs and distribute them among agents

### NetHAM nano Front End

- SSL web integrate with Facebook Application Platform.
- Real-time status update via the push engine.
- Hassle-free user interface.

https://apps.facebook.com/nethamnano

### **Project Status**

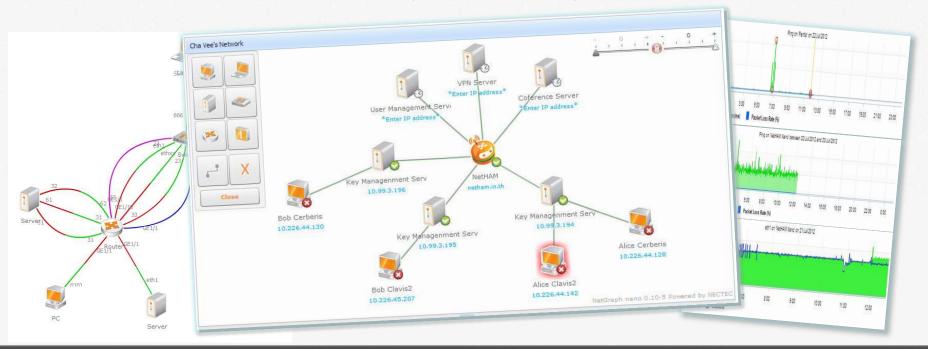

- 75% done.
- Scheduled to be available at the end of 2012.
- Become testers (need an invitation code) at http://apps.facebook.com/nethamnano
- Looking for more places to deploy nodes.

## Looking for Co-Creation

- Deploy nodes to support multiple-point monitoring from different regions/countries.
- Innovative applications e.g.
  - home monitoring
  - location-based service
  - specific information retrieval for end users e.g. weather, disaster report etc.

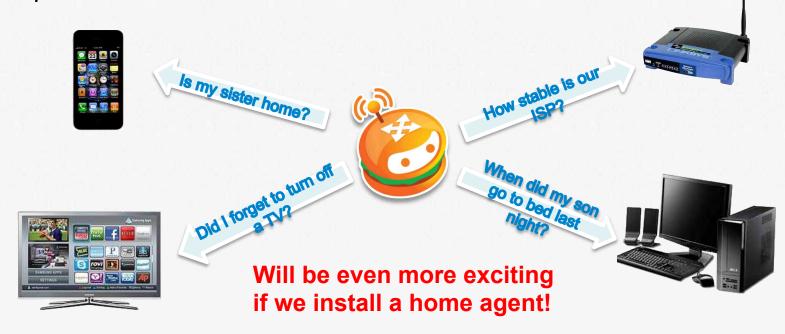

## Some use cases: Network monitoring system

- To monitor network devices such as switches, routers, servers.
- To monitor remote service e.g. PING,HTTP,SNMP (more to be added)
- Support distributed monitoring via multiple agents.
- Suitable for small networks, small offices, websites etc.

# Some use cases: Home applications

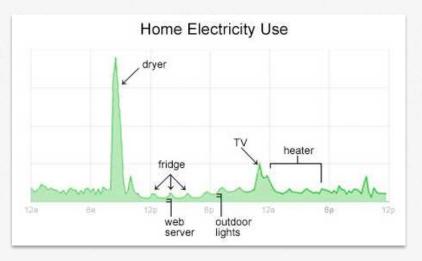

- NetHAM nano can be used to monitor home networks via usual ADSL modems.
- By doing a port forwarding, NetHAM nano could answer these questions :

## Some use cases: Smart energy

- By using a smart meter, it is possible to monitor home electricity consumption the same way as Google Powermeter does.
- Monthly electric bill can be predicted.
- Alerts when there's anything wrong with the electric usage patterns.

# Some use cases: Mobile applications

 By imitating the standard NetHAM nano agent, we can have a compact agent run on mobile phones and tablets.

Somchai

- In stead of checking the remote services, a compact agent checks their sensors.
- NetHAM nano can track device's position, speed, acceleration etc and display on the current UI with a map view.

## Some use cases: Information monitoring

NetHAM nano can gather information from several sources NetHAM nano •"It's going to rain in half an hour!" and notify users according to their •"Leave soon if you don't want to caught in a traffic jam." current locations. •"Diesel price increases tomorrow at 5:00AM."

## **Brainstorming Questions**

- Would you be interested in co-creating NetHAM Nano?
   What role?
  - Tester? Deploying agents? Cloud infra provider? Developer?
- Which areas do you think NetHAM Nano can help with your business?
- Key success factors or risk factors
- Contact nano@netham.in.th
