### NSTDA launches pilot project for electric motorcycle taxi

The National Energy Technology Center [ENTECH], a unit under the NSTDA, recently held an MoU signing ceremony to support electric motorbike taxi with representatives from various organisations in attendance. The United Nations Environment Programme's "Integrating Electric 2&3 Wheelers into Existing Urban Transport Modes in Developing and Transitional Countries" has been planned for six countries in Asia and Africa. As for Thailand, UNEP has worked closely with ENTECH on

the Mainstreaming Electric 2 and 3 Wheelers in Thailand project. In the project's second phase, the pilot use of 100 electric motorcycle taxis has been introduced in cooperation with the Electricity Generating Authority of Thailand and The Stallions.
