Traffy Transit

Bus arrival time estimation system

Mobile application showing bus position and estimated arrival time, useful for public transportation system or internal personnel transportation system. The application also monitors undesirable driving behaviors.

http://transit.traffy.in.th

Benefits to the users

- Knowing estimated bus arrival time
- Knowing drivers' driving behavior
- No more waiting for bus needlessly
- Managing time more efficiently

Benefits to the bus owners

- Tracking each individual bus using GNSS-based sensors.
- Knowing estimated bus arrival time
- Knowing the bus driver's driving behavior
- Being alerted of unusual driving behavior.
- Assisting in managing bus scheduling
- Assisting in maintenance planning
